-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
2. Claims 1-30, 32, 34-35, 41-46, and 55-61 are rejected under 35 U.S.C. 103(a) as being unpatentable over Cariapa (U.S. 5,437,610) in view of Waldrige (U.S. 6,179,796). Please refer to paragraphs 3-15 of the office action dated October 3, 2004.
3. Claims 35-39, 40, 44, and 47-53 are rejected under 35 U.S.C. 103(a) as being unpatentable over Zheng (U.S. 5,997,540) in view of Cariapa and Waldrige. Please refer to paragraph 16 of the office action dated October 3, 2004.

Response to Arguments

4. Applicant's arguments filed 01/06/05 have been fully considered but they are not persuasive. As best understood by the Examiner, the prior art cited recites the claimed method steps, and therefore, the method would inherently result in a change in shear stress experiences by the endothelial cells of a patient. Note that Waldrige discloses pressure ranges in the range of what the Applicant teaches. As best understood, low blood flow can be associated with edema, and furthermore, edema can result in decreased wound healing. With regards to specific ranges, Applicant has failed to establish criticality, and the skilled artisan could choose any of a variety of parameters based on the disclosure. With respect to claims 27-30, Examiner points out that the claim only require that the patient have the claimed disease. There is no relation

Art Unit: 3764

between the disease claimed and the disease being treated as the claims presently stand. As broadly read, the method may be performed on an individual having a variety of different diseases, as the diseases being claimed are independent of the disease being treated. With respect to claims 35-39, 40, 44, and 47-53, Examiner points out that the claimed structural limitations have been met, and therefore, as best understood, the modified Zheng is capable of performing the functional recitations.

Conclusion

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
